IN YEARS TO COME

We will remember not only the draft quotas and the indecision in Korea but also the fellows and the girls, the serious learning and the friendly joking, the carefree laughter at the New Bedford Textile Institute.

International Club.

Class Highlights

Further nightlife throughout the year consisted of a continuous floorshow in Room #2 with Mr. Saltus as the Master of Ceremonies. A cute figure was cut by the exotic Miss Calculus who held the class interest by a strange and powerful bond.

The Californian playboy, DeAraujo, arrived on the scene with three cars which were immediately confiscated by the girls for their new lunchroom.

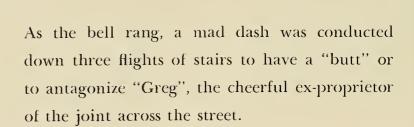

It was in the Chem Lab that the Second Battalion of the Chemical Corps was instructed in the offensive and defensive uses of the water rat. However, the rampage caused Mr. Dupre to tell the class, "It is mandatory that your conduct deviate toward the more stable characteristics of Juniors in college."

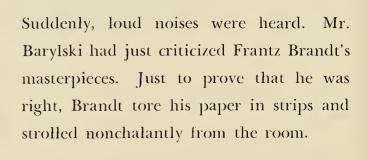

> The end was in sight with the start of the Senior year. But yet, it was the beginning for many as the color of khaki predominated the minds of those who awaited the call.

When the bell sounded the reprieve, the class filed orderly down the stairs to the "sumptuously furnished lounge" to partake of their lunches.

The most outstanding father's award went to John Lowney who, in the course of four years, aided in the production of a trio; Morris Federman came in second with doubles and Maurer, Ashworth, Kuliga, and Paul Lowney were attributed with singles.

It was in this first year of school that the masters of music were assembled under the guidance of Mr. John Barylski and his vibrant "slush pump". The Class of '52 was well represented with "Saxy Zyggie", "Squeezebox" Gonet, "Licorice stick" Barish, and "Skins" Sunderland. Those individuals who lacked the skill to play an instrument usually lent their voices to the accompaniment of this unit.

A heated argument is conducted in one corner by Don Calnan, Pete Sylvia, and Vic Slater. The meat of the situation is Vic's car which won't run and it seems Don Calnan was the last one to "fix" it. Finally, Dick - - - the used car huckster - - - Lake straightens things out by selling Vic a car he "just happened to have on hand."

Al Sarkes led the way in machine shop practice through his adeptness for $\pm .001$ " measurements by eye. However, it was while taking a course in Tool Inspection that Al improved his sight to $\pm .0001$ ". With but another year to go, the boys still turned out square-threaded pretzels and U-bolts.

To the amazement of many of the students, including some Seniors, there was found to be one more room at the Institute. It was a library which was opened to the students on a part-time basis.

The Senior year saw Dave Pearson and Johnny Rocha still one step ahead of the draft. Meanwhile, in the sanctuary, Room #2, Lieutenant Joe Sargent liberally discussed the principles and the points of warfare.

HUMOR

Customs Guard: "What have you in that bag, sir?"

that bag, sir?"
Shanahan: "Sure and its just a little holy water for Father Hogan."

Guard (uncorking bottle) "Well it smells like Irish Whiskey — and it tastes like Irish Whiskey."

Shanahan: "Saints be praised! A miracle."

Calnan: "Hey Charves, how did you ruin your tire?"

Charves: "Ran over a milk bottle."

Calnan: "Didn't you see it in time?"

Charves: "No, the kid had it under his coat."

Mr. Fenaux: "I had a student who caught pneumonia and died last week be-

cause he neglected to put on his jacket when he went for a smoke."

(Silence for ten seconds)

Dougherty: "Can I have his beakers?"

Mr. Giblin: "How come you're late? Don't you have an alarm clock?"

Slater: "Yes, but it went off while I was asleep."

Cotter: "Did you see where a fellow beat his wife to death with a golf club?"

Mr. B. "No, how many strokes did he take?"

A professor is a man whose job it is to tell students how to solve the problems of life which he himself has tried to avoid by becoming a professor.

"Yeah," said George Kuliga, "when I first came to NBTI, I was pretty conceited, but they knocked all that out of me and now I'm one of the best fellows in college."

Mr. Dupre: "Miss, will you please run off 75 copies of this exam?"
Miss: "But, Mr. Dupre, this is the same exam you gave last semester."
Mr. Dupre: "I know, but I've changed the answers."

In a recent statistical analysis, it was revealed that among college graduates, males have 1.3 children and females have 1.7 children. This only proves that women have more children than men.

Mr. Sylvia: "Hold that wire, will you?"

Jose: "I got it, now what?"

Mr. Sylvia: "Didn't you feel anything?"

Jose: "No."

Mr. Sylvia: "Well, don't touch the other one, it carries 3000 volts."

Mr. Tripp: "So, you went to class this morning?"

Red Lyons: "Yeah, how do you know?"

Mr. Tripp: "Your suit looks like it has been slept in."

Student: "Professor, I wish you'd get married."

Professor: "Yes? Why?"

Student: "I'd like to throw an old shoe at you."

KAPPA SIGMA PHI SORORITY

The Beta Chapter of Kappa Sigma Phi Sorority opened its social season in September with a Get-Acquainted Party for the freshmen girls. We all had a good time and made many new friends.

In November, bids were sent to the new girls and six acceptances were received. Hazing took place during the week of November 25, 1951. Highlights of the hazing were a talent show held in the school auditorium, the singing of "I Get Ideas" to Mr. B---, a thorough cleaning of the front stairs with toothbrushes, and a mock band which paraded through the corridors. Eye-catching in costumes out of this world were a South Sea siren in a grass skirt that left its traces all around the building, a stage-shy Indian maid, an airraid warden, a flapper, and a sweet, old lady whose white wig was anchored by a pair of ear phones. After hazing, the formal initiation and banquet was held at the New Bedford Hotel on December 1, 1951.

Our membership strengthened, we turned to the necessary task of redecorating the lounge. The chemistry girls took over the painting while the technologists attended to the curtains and upholstery. To those who contributed their time, talents, and suggestions, particularly Mr. George Walker, Mr. Fred Beardsworth, Mr. Edward Cloutier, Mr. Edmund Dupre, Mr. James Giblin, and Miss Nancy Allen, Kappa Sigma Phi is grateful.

Setting a new precedent was the sorority's next project. On December 11, a luncheon for the faculty was held in the lounge. The room was decorated in keeping with the holiday season and the tables literally groaned under the load of food. Judging from the fine comments received by the sorority, the undertaking was appreciated and enjoyed. For the remainder of the week, the lounge remained open to all the students.

Our activities for the second semester of the year included a co-ed party, a bowling party, an annual weiner roast, and our installation banquet.

The girls of Kappa Sigma Phi sincerely feel that this year was one of accomplishment and that the future will show continued cooperation within the school.

ALUMNI CHAPTERS

MR. LOUIS FENAUX Faculty Advisor

DELTA KAPPA PHI FRATERNITY began its 1951-52 season with a new slate of officers. The leaders were: Robert Sala, Consul; Stephen Dougherty, Pro-Consul; Walter Gonet, Custodian; Richard Lafferty, Annotator; James Siddall, Scribe; Paul Patnaude, Sergeant-at-Arms.

The "Dekes" started off the season with a couples' party at the lounge. Refreshments were served and records were played for dancing. Because the affair was a success, a second party was held in October. The members and their guests really enjoyed themselves; for this reason, the fraternity planned one party for each month following.

A turkey raffle was held just before the Thanksgiving Day holiday with part of the proceeds being used to buy a Thanksgiving basket for a needy family here in New Bedford.

DELTA KAPPA PHI held its first "open house" November 14, 1951. The evening was highlighted by the presence of many non-frat men, along with the active chapter members, a few alumni, and eleven of the school's instructors who are members. A program of sport movies was shown, along with several cartoons. Refreshments followed.

On the last day of school before the Christmas vacation, the fraternity held its annual Christmas party at the lounge. "Santa Claus" visited the brothers and distributed the gifts. Entertainment was provided by the "Dazzling Dekes" under the direction of Mr. John Barylski, who gave a terrific two hour show.

On February 1, 1952, DELTA KAPPA PHI staged its second open house at Carpenters' Hall in the City. Another fine turnout was on hand for the moving pictures that were shown and for the performance of those "Dazzling Dekes." Refreshments were served and the traditional "keg" was emptied.

Came the last week-end in April and the brothers were off for the city of Philadelphia. There they attended the 53rd Annual National Convention of DELTA KAPPA PHI fraternity, with Alpha Chapter of Philadelphia Textile Institute as host. Many of the old acquaintances from the previous year at Raleigh, N.C. were renewed and new ones made. A tour was made of the school and the three-day affair wound up with the banquet.

Upon return from Philadelphia, the "Dekes" closed out the school year with its annual clambake at Perry's Grove. The highlight of the affair was a baseball game between the alumni and the students, which was won by the other team.

DELTA KAPPA PHI looks forward to the coming 1952-53 school season as another year of school fun and fellowship, and wishes its members of the departing senior class and all seniors the best of luck.

Boston, Grenville, New York, Philadelphia, Providence, Chicago, Fall River Charlotte, Albany, New Bedford, Chattahoochee Valley, Atlanta.

At the start of the school year, Phi Psi suffered a tremendous loss in the passing of Executive Secretary Harold Hart, the youngest member of the fraternity. Although not in years, he was by far the youngest member in spirit and enthusiasm. It was through his efforts as a founder that Phi Psi was born, grew solidly throughout the United States and became a national professional fraternity.

All of us who are his brothers should strive to perpetuate Phi Psi as a living tribute to him who loved and served it best.

Soon after, Grand President M. Earl Heard announced the appointment of John T. Wigington as Executive Secretary. Brother Wigington is a member of the Arkwrights, Inc., the American Society for Testing Materials, the American Association of Textile Chemists and Colorists, Secretary of The Fiber Society, Director of the Clemson Alumni Corporation and is listed in the sixth and seventh international editions of "Who's Who in Commerce and Industry." He is presently at Clemson College as Director of the Division of Technical Service of the Cotton Textile Institute Inc.

Brother Wigington is the author of quite a number of technical papers dealing with Cotton Fiber and Spinning Research Work and has been a frequent contributor of articles to professional journals and textile trade papers.

In September, Beta Chapter listed sixty-four active members. Thirteen new members were pledged after the start of the second semester. These pledges, with contingents from Delta and Gamma Chapters, as guests of the respective chapters, received their third degree on March 29, 1952 at the Hotel Beaconsfield in Brookline, Mass. As usual, there was a "long-to-be-remembered" banquet after the conferral of the third degree.

The principal social events of the year consisted of two open-house gatherings, a hayride and barn dance and a Christmas dance.

In respect to Brother "Bill" Liolin, 28 brothers commemorated the anniversary of his death by donating blood to the local pint parade. Bill, an infantry reservist called back into service, was killed in Korea.

Iota Chapter extended an invitation to hold the Fraternity's Annual Convention at Clemson, S.C. on May 1, 2, and 3. Once again, Beta Chapter was well represented and everyone felt that the Clemson House afforded a wonderful place to hold the professional and social activities of the fraternity. Four of the world's most modern textile plants, located within ten miles of Clemson, were visited by the delegates and the alumni. An interesting sidelight is the fact that one of the plants visited is the largest in the world under one roof.

MR. AUGUSTUS SILVA Faculty Advisor

During the past year, the fraternity welcomed the personable and energetic Mr. Augustus Silva as its faculty advisor. In so doing, the fraternity anticipated many years of pleasant association with him. This event took place during the annual installation dinner at the beautiful "Harbor" in Marion. Several alumni were present and all appetites were well satisfied at the expense of several unfortunate fowl. The brothers sworn in were: Norman Friedland, councilor; Leonard Kanner, vice-councilor; Jean Ventura, exchequer; Allan Konner, recording scribe; Lawrence Portnoi, corresponding scribe; and Walter Levin, warden.

Our yearly convention was held in Philadelphia. Several brothers suddenly became plutocrats after having been introduced to a game played with small numbered cubes in the Alpha Chapter's beautiful fraternity house. The brothers stopped in New York to see the sights before returning home. The new pledge class was initiated in the usual appropriate manner and then joined the old brothers in donating blood to the Red Cross - - - an important fraternity activity.

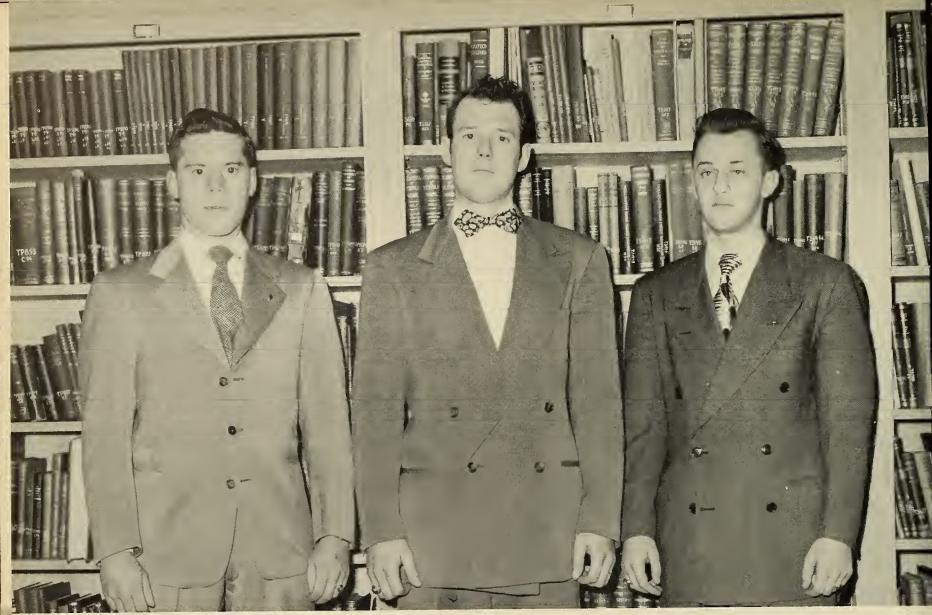

As the new school year began, a very successful dance was held by the chapter in its adopted fraternity house on County Street. The music was provided by Alumni Brother Louis Queen and his orchestra. In November, an open house was given and many new faces greeted the brothers over quantities of a popular beverage.

In 1952, Beta Chapter commenced its program of presenting informal talks on interesting subjects. These presentations, made by members of the faculty, proved to be interesting, educational, and entertaining. As the first speaker, Miss Nancy Allen, who spoke on the subject of Modern Art, received a bouquet of flowers expressing the appreciation of the fraternity.

On Washington's Birthday, the Chapter traveled en masse once again to Philadelphia as guests of the Alpha Chapter for the annual basketball classic. Another hectic weekend was spent on the Philadelphia Textile Institute campus.

As usual, the annual farewell party, in honor of its graduating members, was held at the end of the year. The brothers of Beta Chapter offer best personal wishes to the senior class and feel confident that they will make a fine name both for themselves and for the Institute in the years to come.

TECH TALK, our school newspaper, was first published in 1950. It is a student publication compiled wholly by students with faculty supervision.

The title, TECH TALK, was selected from suggestions sent in by students competing in a title contest. It is a four page newspaper, the purpose of which is to bring forth information of interest concerning the various activities taking place during the school year. TECH TALK helps to interest its readers in the sports activities and fraternal organizations. It has been instrumental in enlightening the student body of various developments in the Textile Industry and also in familiarizing them with members of the faculty.

The editorial staff of TECH TALK, this year, is comprised of Walter Gonet, Editor; Raymond E. Larocque, Business Manager and Eugene Cote, Advertising Manager. Our school newspaper is now in its second year of publication.

Developments are being contemplated, such as enlarging TECH TALK's size to six pages in order to increase the amount and variety of reading material. It is also striving to function as a monthly publication.

The success that TECH TALK now enjoys is due mostly to the efficient supervision on the part of Mr. Augustus Silva, our faculty advisor.

INTER-FRATERNITY COUNCIL

The Inter-Fraternity Council was formed in 1947 by the three fraternities and sorority to bring about a closer coordination of social, educational, and professional activities within the Institute. United in this manner, it was felt that much more could be accomplished by each individual group.

One of the most important duties of this Council is to draw up a calendar of social events for the forth-coming semester. Each group is asked to submit a list of prospective dates to the Council. After all possible conflictions are rejected, these lists are passed on to the Faculty Committee on Controls. If there are no further complications, the dates submitted are considered accepted. The Council is composed of twelve members: each society delegates for the duration of the school year three representatives to the meetings of the Council

At the first meeting, a chairman, secretary, and a treasurer is chosen from the twelve representatives. Also, an advisor is selected from the Instructors at the Institute to serve for a term of one school year.

During the first semester, the Council sponsored a Fall Hop in the gym of the New Bedford Textile Institute. This dance was considered a success both financially and socially. Armand Lewis and his band provided the music which kept the men and their dates weaving fancy steps throughout the cool evening. Refreshments, consisting of apple cider and donuts, were served making the evening complete.

A Patriot's Day dance sponsored by the Council was held in the ballroom of the New Bedford Hotel. Louis Queen and his orchestra played to the enjoyment of the crowd which attended.

The Inter-Fraternity Council and its members wish the Graduating Class the best of luck in all of their undertakings.

During the school year of 1950-51, the Student's Committee of the New Bedford Textile Institute was organized. Acting as representatives of the student body, it carries out the school calendar and other matters pertaining to the student body; it sponsors student activities which are financed by the Student's Committee Fund.

As a beginning of the Committee's project to have more assembly programs, it sponsored an assembly in December which featured Harry Wrench, President George Walker, Colonel Leo Bessette, and Reverend Philip Douglas as speakers. Following this presentation, a Christmas party was held in the school gymnasium.

The Committee's main projects this school year was establishing a cafeteria, promoting more assembly programs, showing a series of historical and entertaining films from the Museum of Modern Art in New York, and holding a square dance.

Through the co-operation of faculty members and Mr. Walker, a standard of evaluating the students was set up. As a result of this, when a student graduates, his record will contain not only his academic standing but also a list of the activities participated in, offices held and honors attained, and a record of general progress.

The members of the Student Committee wish to extend their best wishes to the graduating class of 1952.

The New Bedford Textile Institute's basketball team of 1952, under the guidance of Coach Francis Tripp, opened the season facing an eighteen game schedule.

With only one regular from last year's Southern New England Coastal Conference Championship Team, in the form of "Red" Blanchard, returning for action, Coach Tripp found he had a job in setting up a smooth, well-balanced five. Also returning from last year's substitute list were "Dick" Lafferty, "Don" Morton, and Harry Wrench. Newcomers to the Textile basketball force were Joe Barbero, "Jerry" Escolas, "Little Joe" Perreira, and Norris Drew.

In the opening tilt of the season, Textile played host to Gordon College, losing by a score of 57-52.

Moving on to Worcester State Teacher's College, the Red Raiders lost its second straight game, a thriller to the last second, by a margin of only one point. Joe Barbero layed up a two pointer which would have won the game for our side, but the basket was disqualified because the time had run out.

Traveling next to Bradford Durfee Technical Institute in Fall River, the Red and Grey five dropped its third straight game by the score of 70-61.

For their first victory of the season, the Red Raiders subdued a Rhode Island School of Design quintet by a score of 72-49. "Don" Morton, "Jerry" Escolas, and Norris Drew countered for 45 of these points.

Textile's cagers, in defeating Bridgewater State Teacher's College 63-54, racked up its second victory in five attempts. "Jerry" Escolas and Joe Barbero hit the nets for 40 counters.

Hitting the road again, the Red and Grey dropped the next game to New Haven State Teacher's College. The final score was 68-60.

Meeting an undefeated Stonehill College Quintet in Brockton, Textile again was defeated by the score of 83-35.

NBTI's next engagement, with Lowell Textile Institute at Lowell, saw the Red Raiders on the short side of the score, 57-49, once again.

Coming home to play host to a Worcester State Teacher's College quintet, the Red and Grey avenged an earlier loss by a trouncing of 69-37. "Jerry" Escolas Joe Barbero, and "Red" Blanchard hit the strings for 19, 14, and 12 points respectively.

Traveling to Bridgewater, the Textile cagers dropped the next game to a hard-fighting, aggressive team from Bridgewater State Teacher's College to the tune of 62-44.

Although biting the dust for the tenth time in fourteen attempts, the Red Raiders, nevertheless, offered a Becker College club stiff opposition before falling by the wayside 66-52 on the latter's court.

Holding a powerhouse Stonehill College combine on even terms for all but the last three minutes, the Red Raiders might very well have upended the same outfit that walloped them earlier in the season 83-35. But in those last three minutes, the visitors pushed 6 points through the nets and held on to win 47-41. Barbero, Lafferty, and Drew combined for 29 points.

Fighting a "dog-eat-dog" battle all the way until the final buzzer, Textile's quintet was beaten at the hands of a Bryant combine, 70-64. It was a dingdong battle, with first one club holding a sizeable edge and then the other taking over. Barbero, Lafferty, and Escolas hit the nets for 19, 15, and 13 points, respectively.

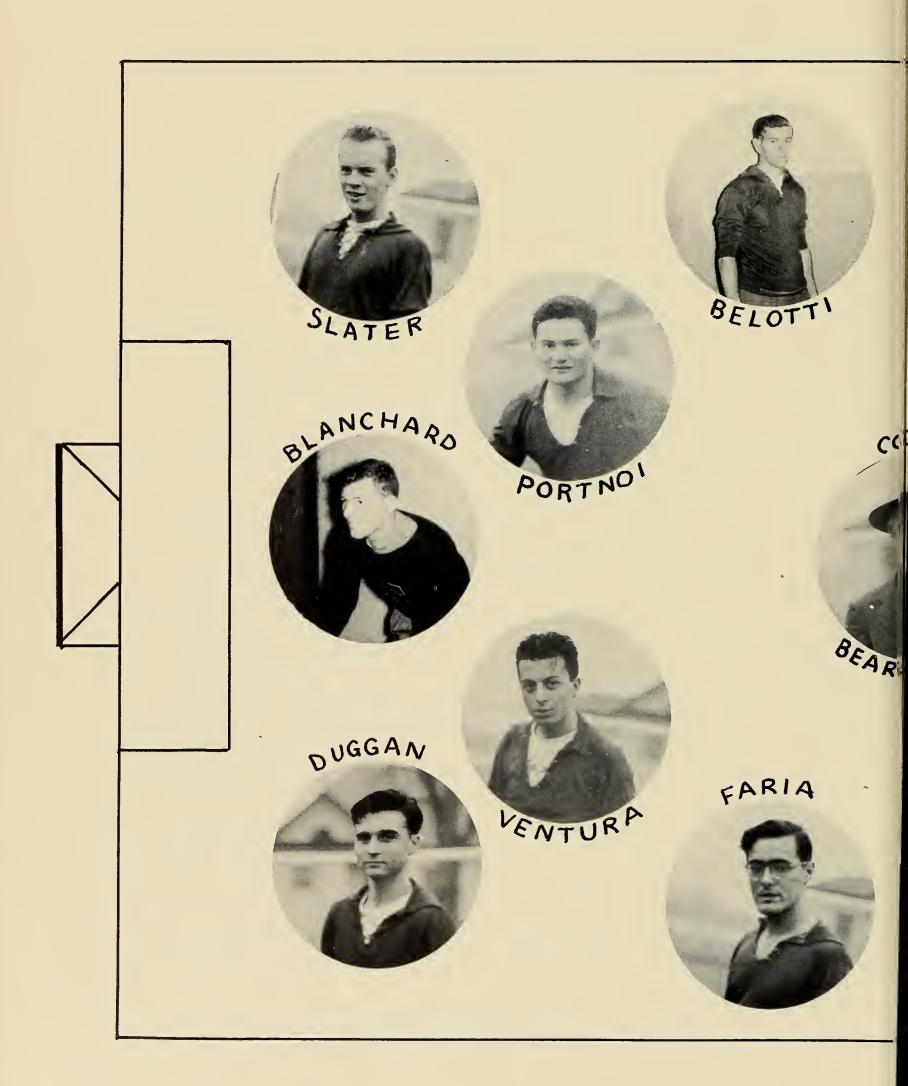

A desperate last ditch rally by Textile's quintet enabled the Red and Grey to climax a brilliant second-half rally and avenge a previous loss to Durfee Textile on the home court. Overcoming a six point Durfee advantage, the Red Raiders copped a 50-48 triumph in the last period.

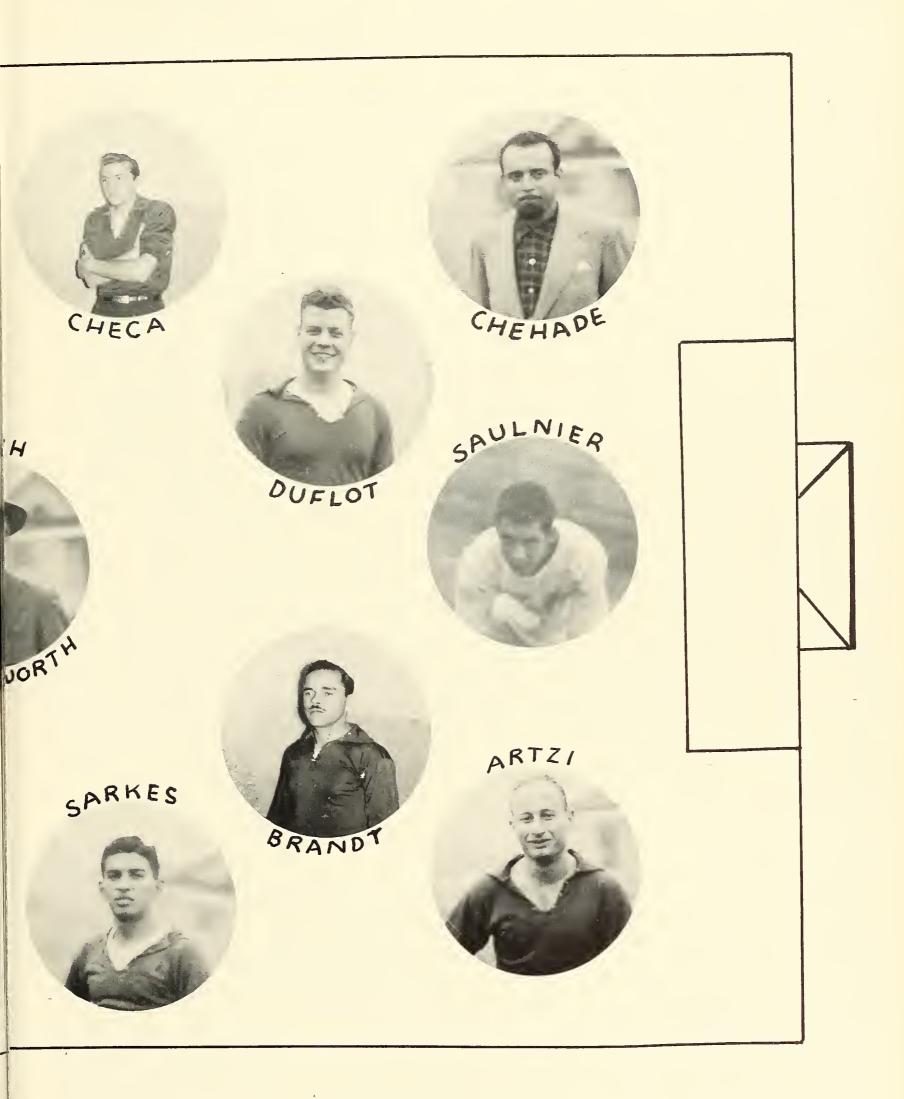

The Trippmen fell before a fourth period Gordon College onslaught, going down to defeat by a 57-51 score at the latter's gym. The game was closely played and hard fought throughout with the lead changing hands several times. However, with the score tied at 45-45 with six minutes remaining, the home forces broke the game wide open by scoring seven consecutive points to ice the contest for the night.

Traveling next to Pratt Institute in Brooklyn, New York, the Millmen dropped their fourteenth to a powerful Pratt Institute quintet by a 77-49 score. "Red" Blanchard, however, took game honors with 20 points.

Despite a brilliant final quarter surge, the Red Raiders took a 64-53 licking at the hands of Philadelphia Textile in Philadelphia. Lafferty, Drew, and Blanchard were outstanding in their attempts to pull this last scheduled game of the season out of the fire.

Picking one of the stormiest nights of the season for its best effort, the New Bedford Textile Institute quintet rendered a good Bryant College five a smashing, 71-40, defeat. The game, a benefit played for the Marion March of Dimes Fund at the Tabor Academy Gym, saw Escolas, Lafferty, and Blanchard inflating the score by a total of 42 points.

COACH FRED BEADSWORTH

SOCCER

	NBTI	Орр.
Keene S. T. C.	5	3
Bridgewater	3	5
Bridgewater	3	1
Lowell Textile	1	1
Suffolk University	7	0
Durfee Textile	6	3
Durfee Textile	1	1

Won 4 Tied 2 Lost 1

A well-played and hard-fought game opened the '51 season for the NBTI booters against Keene State Teachers at Keene, N. H. Textile was off to a good start with three quick goals; but, with the determination of their opponents to win, the NBTI team had a fight on their hands in the last quarter, when Keene State Teachers tied the score at 3-3. Artzi and Belotti saved the day, however, by finding the nets for a goal apiece and giving Textile a 5-3 victory.

The second game of the season with Bridgewater State Teachers at Bridgewater was the only downfall of the Red Raiders by a score of Bridgewater 5, Textile 3.

In the first ten minutes of play in the return game with Bridgewater, Checa opened the scoring. Martinez tallied in the third quarter quickly followed by another goal by Checa to give the Red Raiders a 3-0 lead. In the closing minutes of play, the visitors notched their lone goal to avert a shut out.

After a long and tiring ride to Lowell, the NBTI eleven showed endurance and stamina in battling to a 1-1 deadlock with its arch rival. Roy played an outstanding game at fullback.

Suffolk University of Boston was defeated easily by a fighting NBTI team by the score of 7-0.

The Red Raiders' trip to Fall River for the game against Durfee Tech was made memorable by the exploits of inside left Belotti. On leaving the dressing room, Jorge proceeded to direct the rest of the team in the lead car to the pitch. In the half hour that followed, an un-scheduled sight-seeing tour of the city — offering cemeteries as places of interest — was offered — OR was Belotti lost? The game was a see-saw affair until the second half when Belotti tallied the 4th goal. This performance was later followed by Artzi and Perreira which ended the game with a score of 6-3.

The Textile eleven was visited by Durfee Tech at Brooklawn Park for the closing game of the season. In the mud and rain, Belotti tallied the only goal of the Red Raiders to give them a 1-1 deadlock.

Front row: left to right, England, Rodil, Viera, Cote, Mayhew and Fernandes. Back row: left to right, Richards, Poitras, Haworth, Lafferty, Lapidus, Mgr. Hackett.

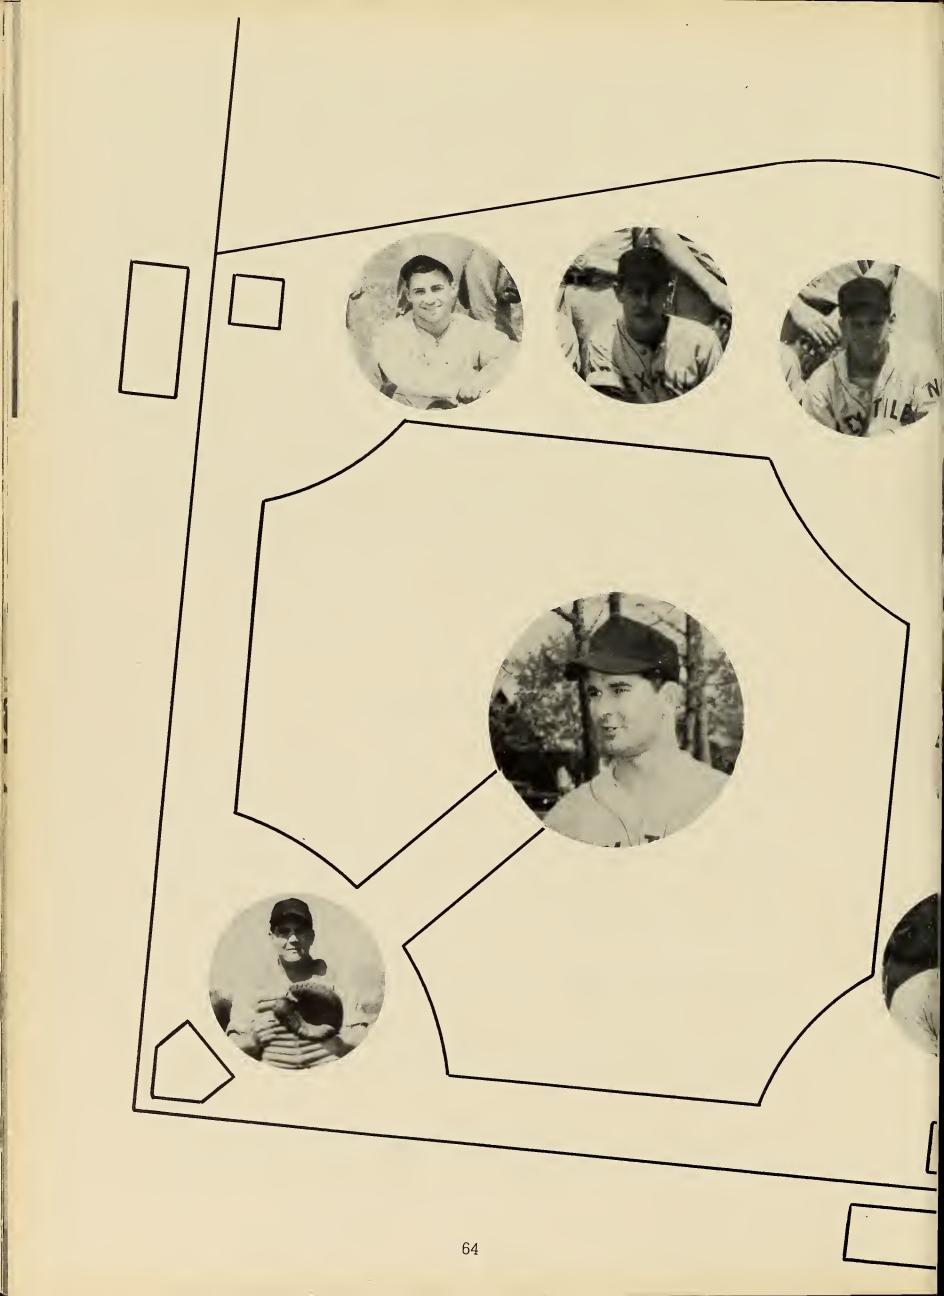

BASEBALL

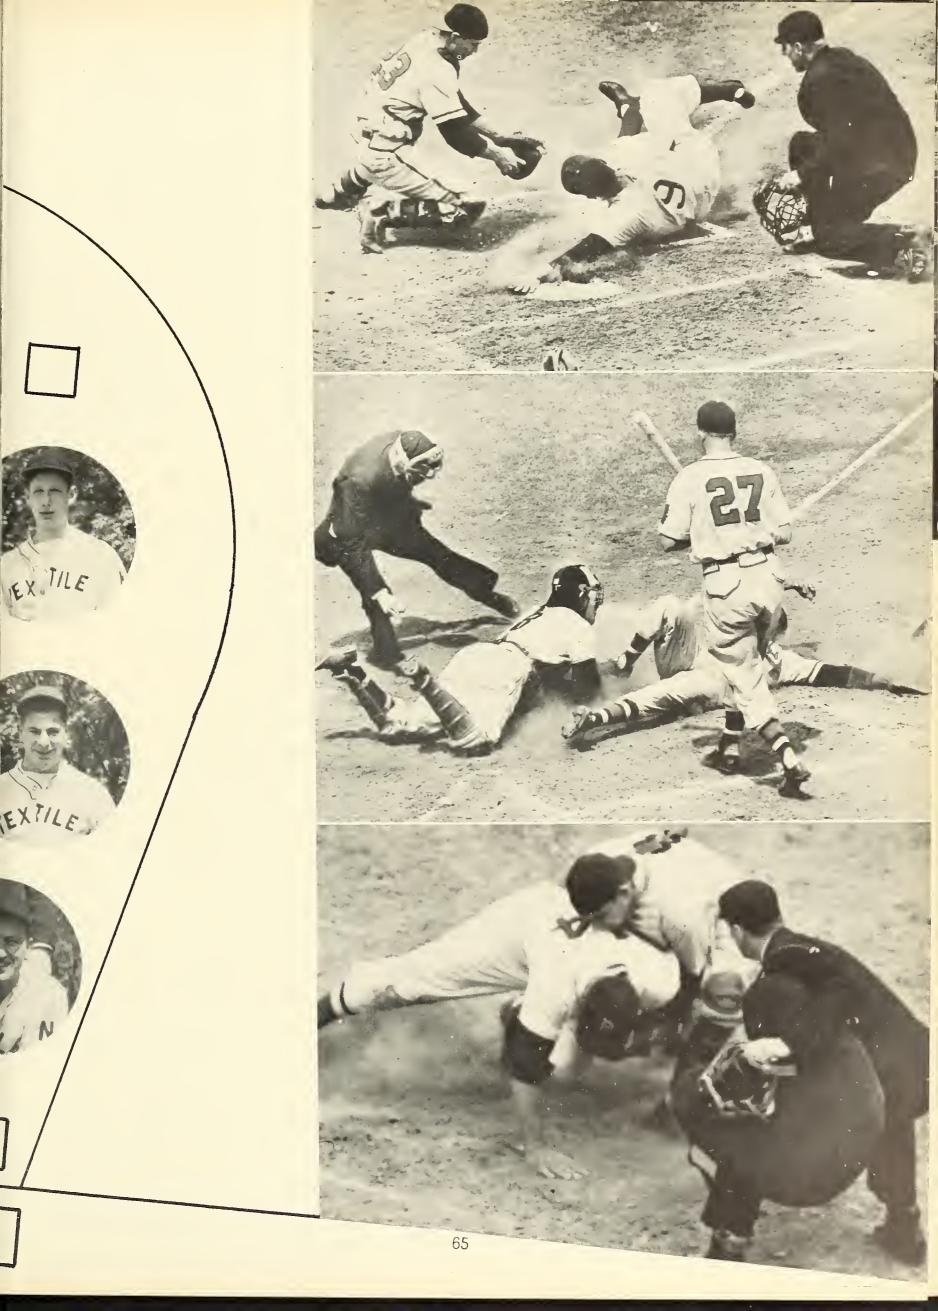

The 1950 aggregation, facing one of the toughest schedules in Textile diamond history, had put away their spikes last spring with a record of 7 wins and 4 losses. This was great news, not only for the school, but also for the fact that almost all the squad would be back in '51, with the exception of veteran "Chinky" Vanasse. The winter rest would be just what the doctor ordered, and with many of the boys staying in condition on the basketball courts, our prospects for '51 looked great.

As Coach Clarry Haskell pondered over the task of preparing a 1951 baseball schedule, so, in the classrooms and laboratories, did new candidates ponder over the prospects of making the varsity.

Soon, expectations became realities, and the trek from Maxfield Street Locker room to the Rockdale Avenue diamond began. The boys were eager to get going; so much so that several aching arms and ligaments developed after a few days' practice.

Among the veterans returning were "Art" Sirois, our dependable moundsman; "Babe" Poitras, the chunky backstop with the diamond know-how; "Lefty" Haworth, the lanky first-sacker who had saved the infielders from many an error in 1950; hard-hitting Leo Kubel, who was still having trouble with

Coach Clarry Haskell

his signs; "Don" Schaller, a dependable hurler; and "Dick" Bachand, the always dependable clutch hitter. Of course, Manager Len Hackett was back to keep our records straight for another year.

The newcomers consisted of Romeo Richards, "Dick" Lafferty, Jesse Fernandes, Norm Cote, England, Viera, Sarkes, Hartley, Charves, and Mayhew. These were welcomed heartily by coach Clarry Haskell after the loss of Thatcher, Carbonaro, Lake, John & Paul Lowney, Vanasse, Higgins, and Furtado.

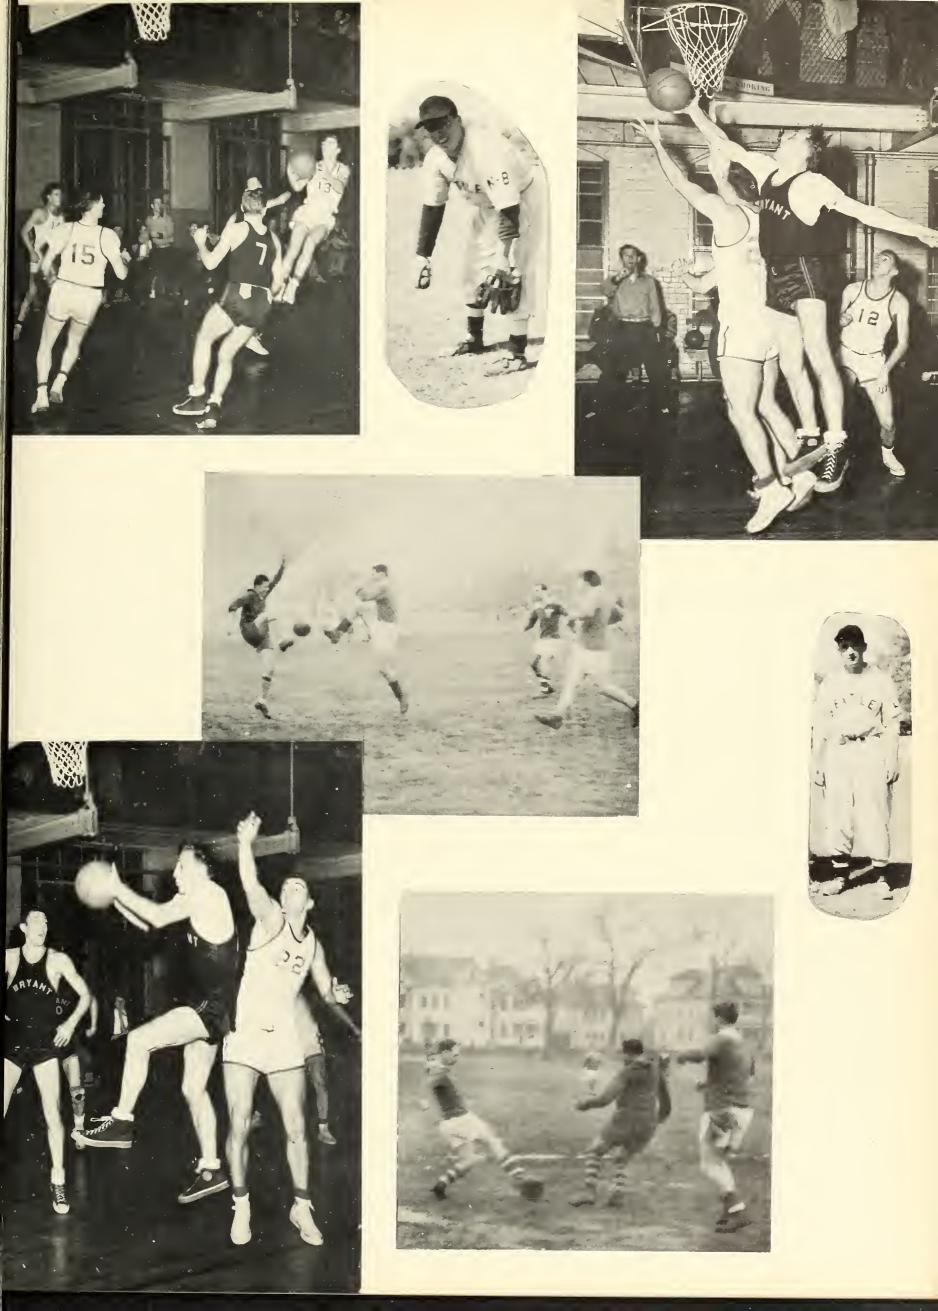

After two weeks' preparation, the starting lineup for the first home game with Stonehill College was released. The infield consisted of Cote, 1b, Bachand, 2b, England, ss, and Richards, 3b. In the outfield, we had Charves in left, Kubel in center, and Sirois in right. The battery was Poitras and Fernandes.

In this opener, Textile won a thriller, pulling out a 6-5 verdict with a two run outburst in the ninth. Leo Kubel was the main cog in this uprising with a timely single with the bases loaded, scoring Haworth and England with the tieing and winning runs. Fernandes pitched a fine game, allowing only seven bingles over the distance.

The next three contests were anything but great for Textile. We lost a heartbreaker at the hands of Assumption College at Worcester, losing 2-1, with all runs in the game unearned. Following this was another 1 run loss at the hands of Bridgewater State, which saw 14 Red Raiders in the line-up, including 4 pitchers. To jar our preserve further, we dropped a loosely played contest to Durfee Tech at Fall River in an abbreviated fine inning contest.

Next in line came our arch-rival, Lowell Textile Institute. We had our ace, Sirois, ready for this one, hoping to get "Art" the victory in his last season at Textile. This was a closely fought affair, with the score standing at 6-6, going into the Lowell half of the ninth. They loaded the bases and singled in the winning run, Sirois again losing another heartbreaker.

Textile defeated Durfee Tech in their next encounter by the score of 7-1, but, again, fell by the wayside to the tune of 6-3 at the hands of Bridgewater State in a loosely played game.

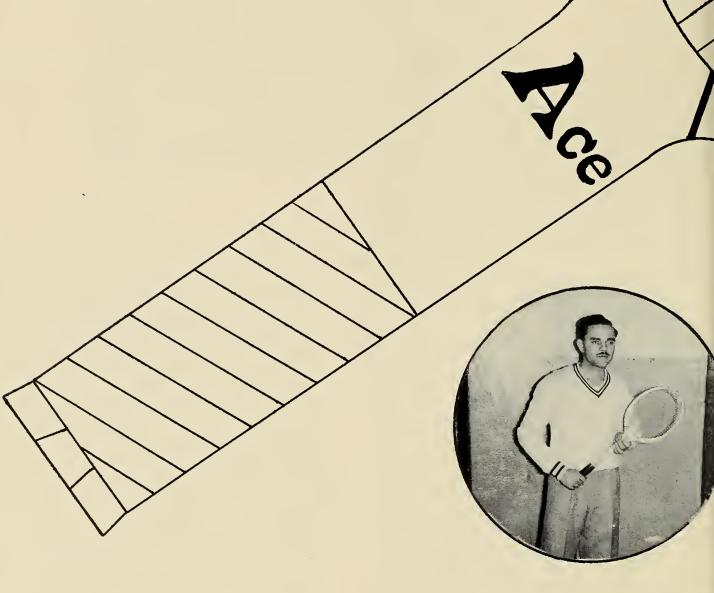

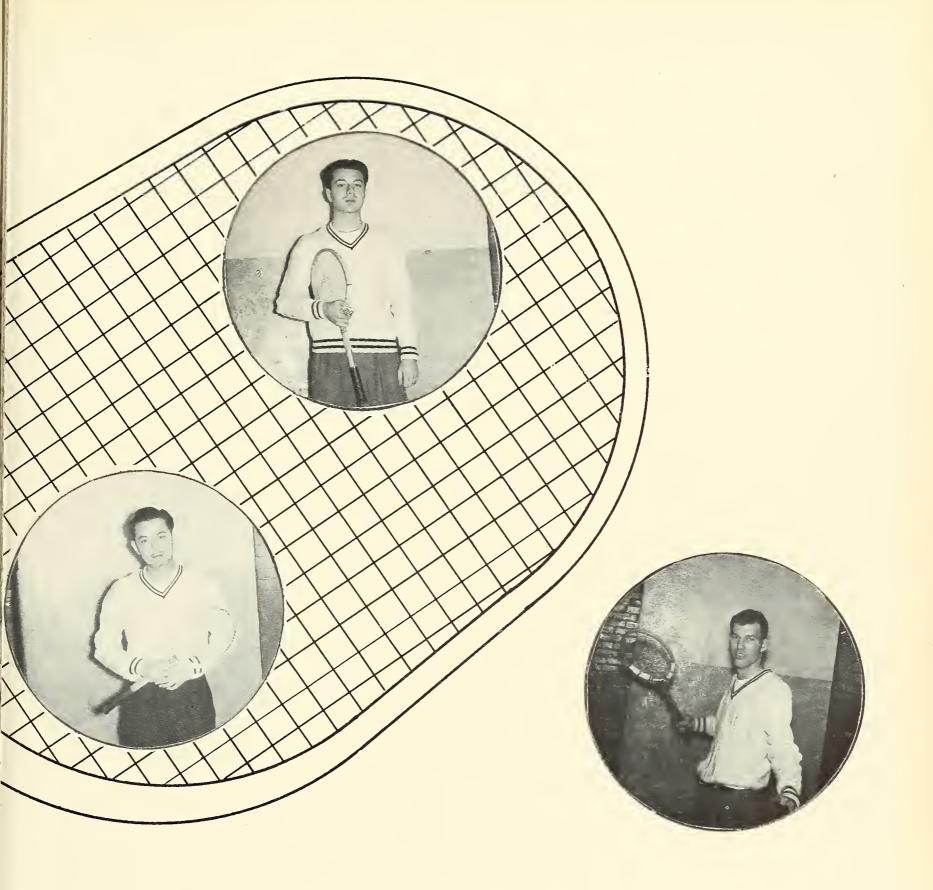

TENNIS

Tennis, ably represented internationally by Frantz Brandt, Jean Ventura, and Channy Chiu and locally by "Rickie" Bernier, "Red" Blanchard, and "Big Jawn" Sylvia, re-appeared once again as one of the actively-participating sports at the Institute.

The tennis team began its season in fine style by defeating Durfee Tech of Fall River on the courts of Buttonwood Park. The final score of the match was 5 to 1 in favor of the Institute, an auspicious beginning and a well-deserved victory.

The next match was the team's initial loss. Playing against a well-drilled Bryant College team in Providence, Textile fought hard but could not avert a 6 to 0 shutout.

Still playing away from home, Textile visited Fall River and again defeated Durfee Tech by the score of 4 to 1. The sets played by Bernier, Ventura and Sylvia were extended and their outcomes were victorious. Chiu lost his singles match, but, paired with Ventura, they easily out-matched their opponents in the doubles.

The final match of the season played with Bryant College saw the Textile aggregation overcome by vastly superior forces. Although the final score, 5 to 0, showed a shutout, it could not be considered an easy victory for Bryant College. As in the previous contests, the Institute combine fought valiantly.

The spring of 1952 found the tennis team scheduled against such schools as Stonehill College, Bridgewater State Teachers, Durfee Tech, and Bryant College. A fine season was anticipated for the team since the majority of the players were returning.

He's green, he's yellow, he's brown, he's black. He brightens, changes . . . and fades his shades.

Color fading, chameleon-style, is out of man's world. For, remember . . . no matter how much his color fades today . . . you can bet it'll be back in brightness tomorrow!

Don't you wish that were the case with the colored products you deal with? Unfortunately, it isn't. Once the bright colors have faded . . . they're dulled out forever.

... but not for you!

That's why it's important to guard against color fading by insisting on dyes that are built to last for the life of the product—dyes that are fast to everything the product's exposed to.

Such fastness can be yours when you turn to Du Pont for dyestuffs! Our technical experts will help you find the right dye for the end use—whatever it may be.

REVERE TEXTILE PRINT ROLLS

A New Bedford Product Famous For a Hundred Years

For more than a century the New Bedford division of Revere Copper and Brass Incorporated has been making textile print rolls. As a result of this long experience the Revere organization is in a unique position to know and understand practical textile printing problems and how to meet them with rolls best adapted to give efficient. economical service. Textile print roll requirements are severely exacting. The copper must be homogeneous, free from imperfections, impurities, hard spots, strata, blow holes. It must be evenly, precisely tempered, sufficiently ductile to be "picked up" by the engraver's tool, yet sufficiently hard to enable the edges of the engraving to stand, without becoming rounded or burred, through long service.

The rolls must be perfectly concentric: they must be straight within close tolerance limits; they must be strong enough to drive a heavy printing cylinder by friction: tough enough to withstand repeated pushing on and off mandrel: and must have the smoothness and texture required to prevent the edges of the

engraving from being eroded by the "doctor"

engraving from being eroded by the "doctor" blades.
The standard, most economical roll is the solid wall copper roll. Rolls of this type can be repeatedly re-engraved, the old engraving being turned off. An average size solid wall copper roll should permit at least 25 such turn-offs, thus affording 26 new engraving surfaces, during its life.

Also available are cheaper rolls, "re-built" by drawing new copper tubes over cores consisting of old turned-down rolls. However, these are more likely to cause trouble, and in the end are definitely more expensive than the solid wall rolls.

Revere specialists with many years of experience in this field are at your service to assist you in specifying and obtaining rolls best adapted to serve your individual requirements. Revere ability to render capable service of this kind is perhaps best attested by the fact that a large proportion of all textile print rolls in use throughout the United States today are of Revere make.

DEPARTMENT STORE

STILL WIDE OPEN

Our American inventors and scientists, backed by our remarkable industrial know-how and skills, may seem to have produced today about everything it's possible to produce. Those with little faith in our country and its future would have us believe so.

But to American youth the gates of opportunity are wider open than ever before. Thousands of new and better ways of doing things, of new products and new developments, will be created by those who properly prepare themselves.

A Career Is Open

A Career in Textile Testing, Development and Research is open to members of this Graduating Class of New Bedford Textile Institute. The United States Testing Company — the largest Textile Testing Laboratory in this country — needs sound, capable textile school graduates as fabric technicians, dye chemists and microscopists.

Not only is a successful career in laboratory fields offered but association with the United States Testing Company can be the basis for a great technical career in textile manufacturing and processing, and allied industries.

You are invited to write to the Personnel Director.
